■ ABOUT OUR COMPANY

■ We design and Build complete modular sanitary architecture systems for GMP environments. We are at the forefront of the industry in production processes and customer responsiveness. With different products designed to complement each other, MCP modular systems present a totally homogeneous and integrated design of sandwich panels, doors, AHU, Ventilation Unit , Refrigerant base Dehumidifier , OT LAF , lighting, profiles, and clean-room pass-through.

■ Our Unit is a pioneering manufacturer of Air Handling Unit, Clean room panel, Modular Operation Theatre (OT), Clear Room Rock-wool Partition, Pharma HVAC Equipment and Laboratory HVAC Equipment Manufacturers in India.

■ Our vision of a production environment in which production facility and production machinery system are organised minimum Human intervention.

We offer our customers all industrial process. of production space, MCP is equipped with process monitoring by means of a fully computerized PC (Production Control) module and state-of-the-art machinery, which, combined with a high production capacity, provides great planning flexibility to adapt to unforeseen events or urgent orders.

• Our Infrastructure.....

Hydraulic Shear Machine

CNC Hydraulic Press Brake - EHP Series

Heat Exchanger System

Electrostatic Powder Coating Machine

Sandwich Panels Foaming Press

Puf Inject Machine

• Our Product.....

- AHU (AIR HANDLING UNIT)
- MODULAR CLEAN ROOM PANEL
- DOORS VENTILATION UNIT
- DOORS
- HEAT EXCHANGER COIL
- FIRE DOORS
- CLEAN ROOM
- EMERGENCY
- OT LAF
- DEHUMIDIFIER

• Innovative Intelligence Air Handling Unit (AHU).....

AHUs are used for maintaining temperature and RH in control areas. For maintaining temperature, chilled water is circulated in CHW coil and for maintaining RH, steam / hot water / electric heaters are used. The AHU shall use an innovative PLC-based control system with a chilled water / Dx type system to maintain temperature and shall use the heat of compression for maintaining RH. A single PLC system can be used to control temperature and RH in various areas. The system is capable of maintaining RH from 30% to 60%.

• Industries We Serv....

- ELECTRONIC INDUSTRIES
- HEALTH INDUSTRIES
- LABORATORY
- PHARMA INDUSTRIES
- FOOD MANUFACTURER
- REGENERATIVE MEDICINE
